MANUAL TESTING

Automation cannot effectively execute all types of testing.

Nemo Tech provide a wide range of manual test services covering complex use cases that simulate real user experiences.

CUSTOM AUTOMATION

Automated testing on real mobile devices

Test both app functionality and real-world hardware performance by automating the entire end-to-end user experience.

BENCHMARKING

See how your app stacks up against the competition.

Our quality engineers compare the performance of your product with competitors in the market, providing you with insight on whether your app is ready to launch.

GLOBAL TEST RESOURCES

More than 150 years of combined testing experience

Our large, quality focused team help you design and execute test plans that meet your time requirements and project goals.

7 GLOBAL LABS

Nemo Tech's quality labs are located in all key regions

Our teams use local devices, knowledge and expertise to meet your local and global goals.

DEVICE SELECTION

A dedicated team of experts help you select the right devices for your programme

Our dedicated team of experts ensure you maximize your coverage of key devices in the market and exclude those that aren't relevant, saving you time and money.

ABOUT US

NeMO Technologies Pvt Ltd is a mobile app testing subsidiary of **Nextgen Technology Ltd,** an experienced interoperability test provider headquartered in the UK. Our vision is to provide a seamless app experience to users, and we believe the most effective way to achieve this is to test with real devices in real-world conditions, which is why we don't use emulators.
